

# Flexible Strip LED for Indoor

Flexible strip lighting systems have become a permanent feature of modern Architect Interiors as they skillfully enhance the appearance of internal structures. These flexible LED strips with high lumen output for mono colour light are easy to install and create dynamic effects indoor applications.

## Technical Specifications

- Every section is up 10cm. Cut to the desired length and mount wherever required.
- 5 metres per roll, 280 LEDs per metre.
- Integrated with SMD 2835 LEDs.
- Constant current LED driver
- Colour rendering index (CRI) is >80
- Protection class IP20 for LED strip
- CE - Conformity mark
- Low Voltage at 24V dc assures safety.
- Ordering guide : KL-7288-CCT ( Colour Temperature )
- Available CCT WW : Warm White (2700K) , CW : Cool White (6000K), NW : Neutral White (4000K).

## Product Benefits

- Flexible LED strip
- High luminous flux
- Cut to the desired length and mount where ever required.
- Designed for highest efficiency in terms of more lumens per watt contributing to a Greener World.
- Easy mounting on many smooth surface with self-adhesive tape.
- Sustainable LED technology offers durability and optimal light output with low power consumption.

LED STRIP LIGHTS

ID	LED	Colour	Wattage	Voltage	LED Qty per metre
7288	2835	CW/WW/NW	26W/m	24V dc	280 pcs

The luminous flux and the connected wattage quoted might change as a result of technical progress. For the latest technical information, Installation guidelines and product updates with LED service life please refer to the website at [www.klite.in](http://www.klite.in)

**Important Note :** To ensure proper installation, kindly translate / communicate the installation instructions to a qualified electrician in their respective local language.
